# Navigating the Future of Security and Risk Management with MCD

OTHERS SELL. WE SOLVE.

In an era dominated by the ever-looming danger of data breaches and escalating cyber threats, the imperative for robust security and compliance measures has never been more pronounced. In this presentation, GMI embarks on a journey into the transformative future of compliance, where the realms of security and risk management seamlessly converge to forge an unassailable foundation for organizations. Explore how GMI's MCD - the world's most advanced security, compliance, and risk automation solution - is on a mission to make compliance effortless and accessible for companies of all sizes.

## CHAPTER 1: THE COMPLIANCE CHALLENGE

Compliance is an arduous journey, demanding meticulous tracking of controls, systems, vendors, assets, devices, and people. Organizations grapple with countless hours spent on manual tasks, diverting their focus from strategic objectives.

Nevertheless, ensuring security and compliance is imperative to earn and maintain the trust of customers and prospects.

## CHAPTER 2: GMI'S MCD SOLUTION

MCD revolutionizes the compliance landscape by putting security and compliance on autopilot through automated evidence collection powered by integrations across an organization's cloud systems.

MCD provides continuous visibility into the compliance status of controls, people, devices, infrastructure, applications, vendors, and overall risk.

## CHAPTER 3: PUTTING SECURITY COMPLIANCE ON AUTOPILOT

MCD's one-sentence mission encapsulates its essence: "MCD is a security, compliance, and risk automation solution that continuously monitors and collects evidence of a company's security controls while streamlining compliance workflows."

This innovative solution has become a game-changer for thousands of companies, helping them streamline compliance frameworks such as SOC 2, ISO 27001, NIST, and more.

## CHAPTER 4: FEATURES THAT TRANSFORM COMPLIANCE

In this chapter, we delve into transformative features that elevate compliance management. These features collectively revolutionize the compliance landscape, fostering efficiency, customization, and transparency.

### Key Features:

- **Risk Management:** Effortlessly match risks with pre-mapped controls for automated tests, putting risk management on autopilot.
- **Automated Evidence Collection:** Liberate your team from manual checks through MCD's sophisticated autopilot system, ensuring seamless communication across siloed tech stacks and controls.
- **Pre-built + Customizable Frameworks, Policies & Controls:** Tailor your compliance program easily, choosing from pre-built resources or crafting customized frameworks, policies, and controls to align with your unique needs.
- **Streamlined Audit Process:** Optimize your audit process with a dedicated Auditor view and a one-click download for all evidence, minimizing the time and effort required.
- **Trust Center:** Elevate your responsiveness to security questionnaires by sharing real-time snapshots of your security posture through the Trust Center.

## CHAPTER 5: BENEFITS OF GMI'S MCD SOLUTION

MCD presents a groundbreaking strategy for streamlining compliance processes. In this chapter, we'll dissect the transformative benefits it brings to the forefront.

- **Automate First:** Significantly reduce the time spent on manual evidence collection and vendor security questionnaires.
- **Simplify Processes:** Take the guesswork out of compliance, reducing the technical burden for your team.
- **Configure Away:** Customize your compliance program to fit your needs with custom frameworks, controls, tests, and workspaces.
- **Monitor Continuously:** Achieve continuous compliance with automated control testing, ensuring a robust security posture.
- **Be Audit-Prepared:** Equip yourself with the necessary audit information and report efficiently to your C-Suite.
- **De-Risk:** Harness the power of automation for risk management, providing insightful reporting that delights the C-Suite.

## CHAPTER 6: CONCLUSION

In conclusion, GMI's Managed Compliance Department is steering the future of security and risk management by transforming the tedious landscape of compliance into an automated, streamlined, and efficient process. Organizations adopting MCD are not just meeting compliance standards but embracing a new era of security confidence, reduced costs, and enhanced operational efficiency.
